

### **Kegeator Normal Operating Sounds**

These kegeators have been manufactured with the new r600a refrigerant gas used on many appliances. We use this particular type of gas as it's the most environmentally friendly gas and it's also more electrically efficient. This type of gas does make some unusual sounds and Kegland have recorded, amplified and included links to these sounds in links below. We have done this so you are aware of the normal operating sounds of the Series 4 Kegeator:

[Series 4 Kegeator - Outside Compressor \(-5C\) ON](#)

[Series 4 Kegeator - Outside Compressor \(-5C\) CLICK OFF](#)

[Series 4 Kegeator - Inside Cold Plate \(-5C\) ON - FAN OFF](#)
